

CURRICULUM VITAE

Personal details:

Surname: Kaweesa

First name: James

Research ID: Noy yet assigned

Date: 18 February 2026

Stage of academic research career.

Research Career stage 1 (Doctoral applicant / early-stage researcher)

Education

2023 | National college of Ireland, Dublin | ncirl.ie

MSc Cyber Security

Modules: Secure Programming for Web, Secure Programming for application Development, Security Fundamentals, Network security and Penetration Testing, Malware analysis, Research methods, Cryptography, Cloud Security, IT Law and Ethics, Research in Computing.

2010 | Kampala International University, Uganda | kiu.ac.ug

BSc Computer Science

Modules: Computer Hardware, Computer networks and Data communication, operating systems, Software engineering, computer programming C and C++, Software project management, Web based data-based development, Software development, Artificial intelligence etc.

Other education and expertise.

Cyber Security Certifications: CompTIA Security+, CEHv13.

AI Safety and Governance courses: Future of AI , Trusted AI Safety Expert (TAISE)

Supplementary professional training in ISO/IEC 27001, NIST Cybersecurity Framework, and NIS2 Directive implementation.

Language skills

Native Language: Luganda

Other language:

English (Professional proficiency)

Current Employment

June 2025-Present

Program Director

CyberGuard Initiative.

Responsibilities include programme coordination , Cybersecurity research activities, community training and evaluation of digital security interventions.

April 2025-Present

Lecturer (Parttime)

Afya Na Haki Institute.

Teaching computer literacy, technology and innovation, Supervision of student research projects.

Previous work experience

March 2024-March 2025

IT Security Analyst.

Tech Domain

- Configuration and management of Endpoint Detection and Response (EDR) solutions.
- Vulnerability management and remediation, including mitigation of CVE-2023-44487 (HTTP/2 Rapid Reset).
- Network traffic analysis and firewall auditing.
- Incident response documentation and security recommendations.
- Implementation of privacy-preserving controls using Microsoft 365 DLP, sensitivity labels, and compliance tools.

2019-June 2025

IT Expert

Center for Health, Human Rights and Development (CEHURD).

- Administration of Windows Servers, networks (LAN, WAN, VPN, VLAN), and Next-Generation Firewalls.
- Cloud services administration (Google Workspace, Microsoft 365).
- Development of ICT policies, backup and recovery strategies.
- Deployment of CRM and call centre systems.
- Cybersecurity awareness training and capacity building

Career breaks

Not applicable

Research funding and grants

No independent research funding awarded to date.

Participated in proposal development and project planning within organisational programmes.

Research output

Publication and scholarly work:

- An Evaluation of Network Intrusion detection systems (Master's research project)

Other research-related output

- Blog article: Cooperative AI, Safety, and What Actually Worries Me

Methods, tools, and software:

- Network traffic analysis using Wireshark
- Security analytics using Python and Jupyter Notebook
- Development and evaluation of security architectures aligned with ISO/IEC 27001 and NIST CSF.
- Programming: Python, Java, HTML and C++.

Research supervision and leadership experience

- Supervision of undergraduate-level research projects (as part-time lecturer)
- Programme leadership and coordination of cybersecurity initiatives at CyberGuard Initiative

Teaching merits

- Teaching experience in computer literacy and network, technology, and innovation (AI).
- Supervision of student research projects.
- Contribution to curriculum delivery in applied computing .

Awards and honours

Not applicable.

Other key academic merits

- Contributor to cybersecurity policy development and ICT governance frameworks
- Participation in stakeholder meetings and strategic planning for ICT and cybersecurity
- Reviewer of internal technical and security documentation

Scientific and societal impact

- Promotion of cybersecurity awareness and digital resilience in civil society organisations
- Development of community-oriented cybersecurity training programmes
- Engagement in public communication on cybersecurity and AI safety topics

Other merits

- Founder and Programme Lead, CyberGuard Initiative (non-profit cybersecurity organisation)
- Over nine years of professional experience in IT systems, security operations, and digital governance
- Strong interdisciplinary background bridging cybersecurity practice, policy, and research
